Meeting New Attractive Women Frequency (elite level 2 per day)

We track your interactions to determine how many new women you meet daily, weekly, and monthly, analysing social engagement patterns for optimisation.

Introduction Rejection Rate Analysis (elite level less than 20%)

By measuring the percentage of rejections upon first introductions, we identify areas to enhance your approach techniques, aiming to reduce rejection rates.

Sustained Conversation Duration (elite level 90 minutes)

We assess the length of your conversations with women you find attractive, identifying moments when dialogue dwindles, to develop strategies that extend engagement.

Instant-Date Success Tracking (elite level 70%)

Our analysis includes the success rate of converting initial meetings into instant dates, utilising this data to refine your spontaneity and appeal during first impressions.

Contact Exchange Success Rate (elite level 80-90%)

We evaluate the frequency of successful contact exchanges when women message you first, leveraging this advantage to boost follow-up interactions.

First Date Success Rate (elite level 100%)

We measure the outcome of first dates to understand their success rate, focusing on the ability to create a strong initial connection and mutual interest. This analysis helps us to refine your dating strategy, ensuring that first dates lead to further interactions and deeper connections.

Intimacy Progression Efficiency (elite level 100%)

Our team tracks the progression rate to intimacy with preferred partners, crafting personalised advice to enhance emotional and physical connectivity.

Post-Intimacy Engagement Continuity (elite level 100%)

We analyse the continuity of your relationships post-intimacy, aiming to increase the success rate of sustained connections by addressing compatibility and communication styles.

Long-Term Relationship Formation Rate (elite level 50%)

By monitoring the transition from casual dating to committed relationships, we identify factors that bolster long-term compatibility and relational depth.

Overall Satisfaction Assessment (elite level 80%)

Through comprehensive surveys and feedback mechanisms, we measure your satisfaction levels in dating and relationships, targeting areas for holistic improvement.

Unlimited WhatsApp Support

- Direct access to your coach for the duration of the course.
- Easily accessible support when you need it the most.
